## Full Stack Web Developer

+91-7007659475 • traza9192@gmail.com • [LinkedIn](#) • [Portfolio](#) • Lucknow

### Summary

I am a dynamic Full Stack Web Developer with proven expertise in scalable web applications, specifically at Acme In Tech. My skills in MERN Stack and UI/UX enhancements enabled me to successfully design and deploy fully functional websites, showcasing my strong problem-solving abilities and commitment to performance optimization

### Key Achievements

#### Traffic Boost Success

Increased website traffic by 30% through comprehensive UI/UX enhancements and performance optimizations.

#### Project Launch Milestone

Developed and launched 2 full stack projects using modern JavaScript frameworks.

#### Efficiency Optimization

Reduced server response time by 50%, enhancing user experience and application speed.

### Experience

#### Acme In Tech

##### Full Stack Web Developer

10/2024 - 01/1970

A technology company specializing in web solutions

- Working on live projects, developing and maintaining scalable web applications
- Involved in end-to-end development, including frontend, backend, database management, and API Integrations
- Successfully designed, built and deployed a fully functional website
- Implemented performance optimizations, enhanced UI/UX, and improved backend efficiency for better scalability

#### DevTown

##### Intern

01/2024 - 04/2024

A company offering technology training and project development

- Implemented an extensible JavaScript to create a project with dynamic working
- Improved learning and problem-solving ability
- Reviewed errors and completed project with enthusiasm
- Learned and gained knowledge by working on projects

### Education

#### Integral University

Lucknow

##### Bachelor of Computer Application (CA)

06/2021 - 06/2024

#### Bright Career Inter College

##### Class 12th

05/2020 - 05/2021

#### Bright Career Inter College

##### Class 10th

05/2018 - 05/2019

### Skills

HTML, CSS, JS, Bootstrap, TailwindCSS, Node.js, Express.js, Next.js, Angular.js, TypeScript, Git, GitHub, Docker, AWS, AWS Services, EKS, EC2, S3 Bucket, MongoDB, PostgreSQL, DynamoDB

### Hush Application

Short summary of your work

- Engineered a **high-performance, microservice-based backend** for *Hush*, an anonymous social media platform, using **Node.js** and **Express.js**, designed to support **millions of concurrent users** across Android, iOS, and web.
- Deployed scalable infrastructure via **AWS EKS**, with services distributed across **EC2**, **RDS (PostgreSQL)**, and **DynamoDB**, ensuring **high availability** and **fault tolerance**.
- Developed and integrated **real-time chat** features using **WebSockets**, including **media sharing**, **voice messaging**, and **anonymous interactions**.
- Utilized **Docker** for containerization and streamlined deployment workflows, while managing and optimizing databases through **Beekeeper Studio**.
- Conducted thorough **requirement analysis**, designed secure and efficient **RESTful APIs**, and proactively resolved architectural and performance challenges throughout the development lifecycle

### Tisane Labs

<https://tisane.ai>

Tisane Labs – Language AI for Safer Digital Spaces

- Developed and deployed a scalable web application for **Tisane Labs** using **Next.js** and **Payload CMS** with **TypeScript**, focusing on modular and maintainable code architecture.
- Integrated **localization features** to support multilingual content and enhance global accessibility across nearly 30 languages.
- Collaborated closely with the product team to implement **AI-powered NLP tools** for abuse detection, sentiment analysis, and content moderation.
- Gained hands-on experience in building enterprise-grade applications for **lawtech** and **regtech** use cases, with a strong focus on **performance, security, and transparency**.

### BagaHolic Boy

<https://bagaholicboy.com>

An e-commerce platform for online shopping

- Developed an E-Commerce website based using ReactJS
- Styled it using Tailwind CSS and used Shopify Hydrogen for backend

### Portfolio Website

<https://tayyab-raza.github.io/Personal-Portfolio>

A personal portfolio showcasing web development skills

- Developed a responsive portfolio website using **HTML**, **CSS**, **JavaScript**, and **Bootstrap**, showcasing personal projects and technical skills.
- Implemented modern UI/UX design principles to ensure **cross-device compatibility** and smooth user experience.
- Optimized site performance and structure for **fast load times** and **clean, maintainable code**.
